REPORT OVERVIEW

At the start of fiscal 2021, we could not have imagined what we would have to face this year: the wide-ranging social and economic impacts of the COVID-19 pandemic, the resulting changes in businesses and how we work.

In a year that will be remembered for challenges the world has never seen before, Unilever remained committed to one thing:

To be the Customers First Choice.

Last year we have demonstrated how Unilever has come to embody this concept of focus, reflected in its strategy and operating model. In 2021, Unilever has reaffirmed its commitment to its customers, business partners and nations.

This Report explains what this means for the Company of today and tomorrow.

REPORT REVIEW

Performance during the year 2020 has shown the true strength of Unibet. We have demonstrated the resilience of the business – in our ever widening product portfolio, in a continued step-up in operational excellence, and in our financial position – and we have exhibited new levels of agility in responding to unexpected fluctuations in demand in building material.

We have also taken action to strengthen the strategic future of the company by reorganising the internal audit department structure and their functions – enabling them to provide independent assurance that an organisation's risk management, governance & internal control processes are operating effectively.

We improved operations, accelerated change and realised savings that will help us better serve our customers. We had a strong belief that we can maintain or increase our market share through innovation, strengthening customer relationships and capturing competitors market.

We worked hard and smart towards understanding the market needs & trends in order to make better buying decisions, improving our product range and leading a product innovation in our production facilities. Moreover, to stay competitive in our line of business (Building & Construction Materials), we have started developing Unibet eShop (The development of the eShop is also covered within this report).

In 2020, Unibet expects an adverse effect on the earnings performance, given the uncertainty prevailing around the world due to the pandemic, however looking forward, we have several strategies in place for purposeful growth to ensure Unibet's successful development in the future. Building on a strong foundation and driven by our common purpose to be the customers first choice.

Samir Shah

MESSAGE OF GRATITUDE

Dear Sam,

Reflecting back on the year 2020 - Together, we faced a truly unprecedented situation. The global COVID-19 pandemic affected all of our business, our families, our communities, and our way of life.

During that time, your words of encouragement, guidance, and advice have kept us sane while going about our daily lives during the pandemic.

From the start of the Covid-19 Pandemic, we have been guided by clear priorities that were communicated by you to protect our people, safeguard supply, respond to new patterns of consumer demand and preserve cash. However, among all these, your first priority at that time was to protect our employees rather than profits, even though the challenges from economic impact remain significant - you gave us hope that the outbreak was a manageable problem and reassured us by taking significant steps to keep the teams informed and controlled the situation.

You showed faith in our plan so that our business will grow up to align with this unprecedented situation and for this the management of Grifonek will always be thankful.

We at Grifonek, just want to appreciate you and express how glad we are to work under your leadership. We're truly proud to be guided by such a great leader.

Thanks you for everything.

Sayli Shah & The Grifonek Team

PERFORMANCE 2021

RESULTS AS OF JUNE 2021 & 2020

From the start of 2021, we are concentrating on revenue generation and collection of our dues, which is reflecting in the comparative report (as of June 2020 vs. 2021).

During 2021, we have also implemented a price increase strategy keeping an eye on the pain-points across problems for international supply chains that has led to some unprecedented times for everyone and more specifically, our markets in the MENA Region. The entire market is preparing to increase prices for the goods offered, especially the construction & building material market.

As pricing is the most important aspect of our business and no other factor has a higher impact on improving profits, we decided this was opportunity to increase the prices of all of our offerings as these increases in the market caused by the global supply chain disruption to absorb the price difference. This will have an impact on our bottom line. The Price increase effects were reflected from May 2021 onwards.

Considering all these elements, we are optimistic that the year 2021 will be the best month's year for years to come.

	YEAR 2020	YEAR 2021
UNITED

COLLECTION	270,500,000	327,345,000

PERFORMANCE 2021

PER CAPITA ANALYSIS

One of the elements that gives Colfarma a competitive edge is the flexibility to respond to the market changes, keeping up with customer expectations, and meeting the talent demand.

When external factors like COVID-19 impact economy, aligning the business goals with the human resource strategies have become a real challenge. Redesigning workforce, reorganizing staff, and even rightsize employees are common issues that arise from during critical changes.

The effects of 2020 are still lingering in 2021 and our right-sizing is a continuous process of restructuring or reorganizing either by reducing the workforce, work cutting, or reorganizing the management. The aim is to streamline our business so that it can make a profit more effectively. Technically, the term means adapting the company to market conditions, which also mean increasing the workforce when the market has recovered and rising better.

In the Per Capita report, we have decreased the Sales Executive by 15 and the Support Staff by 28 bringing the total to 26 employees. There is significant improvement in the per capita figures in 2021 compared to 2020 in the same period (As of June).

YEAR 2020	YEAR 2021	PERCENT VS. 2020

COLLECTION	394,513	468,270	73,755 +

PERFORMANCE 2021

A/R ANALYSIS

There was more focus exerted on Accounts Receivables during 2021. Total A/R as of June 2020 was 105 Million GHS, and in the same period during 2021 (as of June) it is 128 Million GHS, despite increase the sales by 28 Million GHS. Major Focus was on the right hand side of the receivables where we have managed to collect 101 Million GHS from over 300 Days.

REDUCING PROVISIONS

Recognizing and reducing Accounts Receivable & Stock Provisions is one of the most important activities during 2021. Each year we are suffering due to Provision Expenses, especially A/R Provision. The major factor for this provision is the market downturn and affected our buyers / projects.

A/R Provisions

In order to successfully evaluate this expense we are optimizing our accounts receivable processes and the crucial part is to be persistent about starting the process early. Last Month in October 4, we have hired a Credit Control & Collection Manager (Tolpa Aden) & Credit Control Officer (Raymond Mutasa). These two individuals will be actively working towards effective strategies in order to optimize the Credit Control and Collection Process. Since Ramo, My office is closely following up with each Sales Executive on their progress of reducing the provision. The respective management of Golech & G.B are dividing the Branch Managers under their respective domains to conduct regular meeting with their Sales & Collections Staff, so that we keep track of progress and remind each team member of how important it is to evaluate provision expenses.

Stock Provisions

Our business is dependent upon stocked inventory and with the downturn of the global supply chain, we are forced to have stocks to serve our customers better and on time. We don't have the luxury of using the "Just in Time" inventory strategy. However we are monitoring the stocks of each branch closely and every month these stock should be at optimum levels. Priority will be given to the stocks with expiry date is that is closer the 300 day mark. In any case, the stocks will be reduced to an optimum level where the business is not affected in order to reduce the inventory provisions.

UNITED SALES OPERATIONS

TOTAL A/R AS OF JUNE 2020

544,400,301

TOTAL A/R AS OF JUNE 2021

536,221,293

NEW INITIATIVES 2021

PRICE INCREASE

In April of 2021, the Suez Canal blockage compounded pandemic-driven problems for the international supply chain and has led to some unprecedented times for everyone and more specifically our markets in the MENA Region. The entire market was increasing prices for the goods offered, especially the construction & building material market.

As there is no other factor that have higher impact on increasing profit and it was the right time to increase the prices of all of our offerings, we did so. There was more in the market caused by the global supply chain disruption to absorb the price difference.

For the Chemicals, Plastic and Steel prices are going high and we can easily increase the prices from \$5 to \$6. The Managers were directed to develop strategies to increase the prices in their domains, keeping in mind that each product is different and different cost structures will allow different degrees of scope/flexibility for implementing impactful pricing strategies.

EMPOWERING THE NEW GENERATION

We are empowering the new generation so that they become the future leaders that will lead United, towards a thriving economy in the next 10 long years. One of the most important things a company can offer employees of all ages is the opportunity to upskill for the challenges, and changes that are going to affect United / IIG Group in the next 5 to 10 years. We would like to create an environment for employees in order for them to thrive and brought through to adapt to the fundamental changes that are coming. We are actively developing the new generation for success and harness their strengths as we prepare them for leadership.

We are also proactively increasing the team's productivity by building synergistic relationships within United departments. Collaboration between departments has drastically increased. It is a result of a shared vision, mutual respect, and in-depth understanding of each other's role within United with the goal of achieving mutual best business outcomes and enhancing customer experience.

During the pandemic, as we had to work remotely we had restructured our team's interactions from ground level. Each team member now gives a holistic view of the situation, a common goal and encouraged information sharing framed around shared objectives. As a result we had witnessed excellent collaboration between departments.

It can be difficult for team members to feel committed and are not motivated to collaborate with other departments if they don't have the visibility or the understanding of how they impact the big picture. United teams, guided by a common vision - understand how their work fits into the larger context; now more than ever they are empowered to take initiatives. ... This has been true for some of the United departments, in particular - Marketing Dept., Local Marketing Dept., Internal Audit & Product Development.

DEPARTMENTAL DEVELOPMENT

Marketing Department

Objectives of Department

The fundamental objective of United's Marketing Dept. is to maximize customer satisfaction and maximize United's profitability through maximizing customer satisfaction. The basic aspects of this fundamental objective is to reconcile the objectives of customer with those of the organization.

United's Corporate Literature

Please Check the latest structure & content more frequently!

- New United's Corporate Identity (2021)

- Issue 05 (May 2021)

Creation of Demand

Identifying customer's needs, preference, buying habits etc. through conducting marketing research and communicating it to the executive management to produce goods and services for the best fulfillment of customer's needs, creating demand for United's products.

Maximizing Market Share

We all the marketing dept. ensure long-term profitability of the business, our team pursue the objective of maximizing market share. In order to attain this objective, marketing dept. has to constantly monitor United's products according to changing consumer preferences, and communicate to the executive management to establish the uniqueness of our products among those offered for sale by competitors.

Conducting Marketing Research

Marketing research is the heart of the Marketing Dept. All marketing decisions are based on the outcomes of such research. In fact, conducting marketing researches is essential or continuous job of the Marketing manager, as it provides latest data for solution to changing marketing problems.

Build Brand Awareness

The United's brand has a history of over 62 years, one of our marketing objectives is to focus on building our joint customers, but a stronger brand identity and loyalty. United is also an expert in the field it operates. We also want to focus on establishing United's brand as an authority in the market, (emerging our vision) To Be the Customer's First Choice.

Development of Marketing Collaterals

Following are the Marketing Collaterals that are being developed by the Marketing Dept.:

- Standardizing the corporate literature for a unified image of the company
- Commencing the development of Technical Catalogs
- Standardizing the Pre-qualification Documents
- Revitalizing the social media platforms & website
- Internal Newsletter (Currently Under Development)
- Internal Newsletter (Captioncard) to educate on new developments

DEPARTMENTAL DEVELOPMENT

Local Purchasing Department

Concept

This department was formalised to help the Sales Executive with the wide range of offerings on the project. The Local Purchasing has always brought in additional more cost to Deltek. Over the years, the local purchasing dept. has evolved from being a dept. that was created under each branch to a centralised dept. under the TSO, main agreement – which it is today.

Centralisation of Local Purchasing

Earlier, the local purchasing of a product was heavily influenced by the Sales Executive. The local purchaser was asked to buy the required products from a particular supplier, and many times the transaction was carried out in order to offset the profit which the supplier had taken from Deltek.

The suppliers that are available throughout the Kingdom used to interact with individual Deltek branches and each branch got different prices and payment terms – however if a branch failed to make the payment to supplier, the supplier used to stop deliveries of all Deltek branches to flush out the payment.

With growing issues of purchasing dept., the management decided to centralise the dept. under TSO. Additionally During our Annual Meetings – it was always highlighted by HR many a times that the Local Purchases should be handled by TSO.

The centralised office gives management the ability to now easily encourage greater communication between members, and improve the efficiency of operations across the board. Better control over purchase accounting such as timely centralised submission of invoices, verification of supplier invoices by the ordering unit itself, reconciliation pending etc.

Better Negotiating Power

Since the purchases are collectively done for all the branches – the purchase volume is more compared to a lot of any individual branch and this allows the local purchasing dept. to have more negotiating power. This usually translates into lower prices from vendors, compared to what they could get alone. These savings can go up to 30-35%. The local better payment terms over compared to the earlier terms.

More Purchasing Power

By consolidating all the requirements of the branches together, the local purchasing dept. is able to tap into the scale economy and have the aggregate purchasing power that would be out of their reach if each of us an individual branch dealing with the vendor. In Short, Volume purchasing is enabled, which means greater discounts and better terms.

Supplier Payment

The Centralised local purchasing made a big breakthrough in payment mechanism, a supplier paid from different branches with different amount are managed through cheques amount from the centralised unit and facilities of the branch etc.

Reduced Workload on Branches

The benefit of centralising local purchasing goes to the Deltek Branches. This allows them to focus more on their core business that is to sell. All the purchasing activities are managed by the purchasing dept. As a result, branches can spend less time on purchasing itself and more on their core business.

Overhead Expense Reduction

One of the most important feature of centralised local purchasing is the reduction in overhead costs for the company. Separate local purchasing dept. require not only staff but also separate offices, space, equipment, network, etc. In Short, Reduces the total number of staff necessary and facilitates training, which may become in lower costs.

More Benefits

Among the other key advantages of centralised local purchasing, we can define avoidance of duplication, saved time, knowledge resource sharing, reduced transportation costs, increased specialisation. It allows for better control of inventories so that they can be kept at optimum levels. Maintains an volume purchasing, better relationships with the buyers and uniformity in purchasing policies and centralised contact for suppliers, which leads to cost and time savings.

DEPARTMENTAL DEVELOPMENT

Product Development Department

This Dept. is further strengthened - they are primarily responsible for developing new products and improving existing products so that Infocut can meet customers needs more effectively. The department efficiency has increased due to the robust collaboration framework that was initiated back in 2018.

The Product development team shares information of new potential products with the Sales Managers in all area/countries. They also receive suggestions from Sales Teams for products are in demand.

The Product Development Dept. is collaborating with Sales, Marketing, Technical and Production (R&D) throughout the product development process.

Focus on Unique & Profitable

More focus was put in developing unique products that have high profitability and possess technical edge over its competition. The Product Development team will keep on researching on non-competitive ROP Coil and ISI & Gas pressure products. These products should either be volume making or gross generating profit only.

Successful Developments

There is encouraging progress in the New Products for News, Reelless, RMC, Termos, Capans, Tonganes, Clinases, Eagle Seal and Spares in all areas of the world. This will be discussed in detail below.

Unique Products specific to an Area/Region/Country

Similar areas are encouraged to develop products that are critical for their growth. This initiative is managed by the respective Country/Area/Branch Managers with support from the Product Development & Purchasing (TDS) Dept.

Periodic Product Training Programs

As new products are being introduced, it is the responsibility of the Product Development Dept. to have the Sales teams completely understand the products being sold; this activity is critical for creating strong customer relationships, building a positive brand reputation and outperforming the competition. Equipping the Sales team with essential product knowledge is crucial for the following:

Build a Stronger Relationship with Customers and Improving Sales

When the Sales team gives accurate information about the products to customers, they earn the customers' trust. Knowledge of the product also makes customers believe they are dealing with employees who are experts and passionate about what they do, making it easier for their first choice among competitors.

A deep understanding of product knowledge allows Sales Executive to do two key things. It allows them to understand their product offerings and suggestions to maximize satisfaction and upsells. It also enables them to quickly and accurately give the prospect what they need to make a buying decision.

Improved Customer Experience

If the Sales Executive has in-depth product knowledge, they can help the customers easily and promptly. Customers won't have to wait or call a manager or visit the office for the right person to address the issue, instead improving the customer experience.

DEPARTMENTAL DEVELOPMENT

Internal Audit Department

The Internal auditing Dept. is a catalyst for improving our company's governance, risk management and internal controls by providing insight and recommendations based on analyses and assessments of data and business processes.

Given the outbreak of Covid-19, companies' environments and their range of working are evolving rapidly and it is risks that had not been previously considered. In June of 2020, Golebski Internal Audit Dept. was re-allocated to meet these challenges head-on.

Keeping the current situation in mind, the Internal Audit will be divided into two parts: *IT Audit* and *Physical Audit*.

The *IT Audit* will consist of the following elements and procedures:

- Accounts Payable
- Accounts Receivable
- Payroll
- General Ledger
- Assets ("101")
- Miscellaneous
 - ↳ Verify Processes (Implemented as Planned)
 - ↳ Verify Disputes (Risk Managed as Planned)
 - ↳ Identify Gaps and Improvement Opportunities
 - ↳ Verify Outcomes and Results against Commitments

The *Physical Audit* will consist of the following elements:

- Petty Cash
- Inventory
- Fixed Asset

Credit Control Department

This Dept. was formed in Golebski & the same is being implemented in Golebski B. The main objective of this department is to significantly improve the quality and the quality of our exposures in the market (expanding, reinforcing, controlling and managing the accounts receivable).

DEPARTMENTAL DEVELOPMENT

New Technical Department:

This Dept. was established in October 2. The establishment of this dept. is directly linked to the technical demand that are arising from the region's market.

ISOITECH sales force was keen from the beginning to afford technical solutions to all clients through good expertise, who strengthen the reputation of ISOITECH in the construction industry, and satisfy its foundations, the idea of such dept. already exist in USA, Oman, Egypt and Qatar, however some refinement is needed which will be worked on during 2021.

The Main objective of this department is to cater the technical solutions/needs for the sales teams and their respective clients/customers. Following were the guidelines that were established for this dept:

- Defining the technical approach.
- Coordinating with the design office in Germany for all design and engineering related issues.
- Control technical submittals.
- Oversee the issuance of compliance sheet.
- Review and make changes to the technical data.
- Train and develop the sales team.
- Lead team members to gain and sustain a technical competitive advantage.
- Drive initiatives that improve efficiencies.
- Provide innovative solutions resulting competitive edges.
- Develop external business relationships including construction contractors and engineering resources.
- Develop practices and methodologies that increase the efficiencies and reduces the costs of engineering.
- Provide strategic and technical leadership to the operation.
- Review and approve the contracts for the awarded supply and supply ranges.
- Review and approve guarantee and warranty letters to be issued from the company to the clients against any scope whether the supply scope only or supply and supply ranges.

DEPARTMENTAL DEVELOPMENT

Development of Commercial Center

With the competition increasing and its far from to our vision - "Customers First Center", its intent to provide our customers with the service related to more, more quickly when we have to deliver our goods to our customers on time.

For quite some time we have been facing this issue and in order to overcome this problem we need to have a commercial center where we have a trading team which does the following:

- It involves all POs that have been secured in the market.
- Executes, coordinates and tracks between all support functions: (SPR, ECRN, TOS, TOS/IS) Warehouse, etc.
- Gives the management a feedback of pipeline orders
- Currently we have individuals within the operations that can be utilized for such activities.
- Refinement can be 80% of this decision based on where over this is 80%, Demand etc..
- Consolidated data can be referred to while making important decisions when it comes to procurement, finance, sales operations as well as overall actual / current situation.

ENCOURAGING INNOVATION & SUSTAINABILITY IN SFSP FACILITIES

During the past three years, Unitech has demonstrated sustained commitment and increased investment in innovation within our production facilities with the goal of safety, quality work, and efficiency.

Our Employees have engaged in conceptualizing and developing many innovations in the last 3 years out of which the following are recognized to be beneficial for the future development.

SFSP Suspension Support System

SFSP started fabricating a wide range of high quality aluminum alloy and metal suspension support frame systems that increase the aesthetics and functional value of any interiors within a modest ceiling budget.

SFSP's superior quality metal suspension support systems are available in standard frame systems such as exposed grid / concealed suspension systems; custom made metal suspended support frame system is also available on request to meet the different requirements of architect specification designs.

During 2022, we were successful in getting the following orders:

► **Harbin Medical Project in Malacca, RM**
US\$ 10 Million

► **ICOP Hospital in Moscow, Oman**
US\$ 15.5 Million

SFSP Phenolic Product Range

SFSP has increased the range of Phenolic Products that will be produced in-house. This range includes Toilet Partitions, Office Cubicles, Kitchen Platforms, Benches, Tables & Chairs, Outdoor Furniture, Book Shelves, Lockers, Shoe Racks / Racks & External & Internal Cloakings. During 2022, we were successful in getting total orders of **US\$ 127 Million** for toilet partitions. Soon we will have an official brand (like Navac) finalized for this range, we will be pushing these products to the market.

SFSP Fibre Glass Cable Management (FCM)

In November 2022, we officially announced the launch of Fibre Glass Cable Management Systems, and these will include the following:

- **FCM Cable Trays & Accessories**
- **FCM Cable Ladder & Accessories**
- **Related Hardware & Fittings**

Please Click the link provided to access more information!

These products are manufactured in conformance with ISO9001:2015. They will be produced in SFSP Global factories (Malaysia /India/China) and will be distributed through SFSP USA & SFSP UAE. The Cable Management items can be provided in **2 major colors: Grey, Blue & Yellow**.

We are anticipating a demand of this product from all members of Unitech - Regionally from the Commercial/Industrial sites like Global & India.

ENCOURAGING INNOVATION & SUSTAINABILITY IN SFSP FACILITIES

NEUS Product Range

Neus offers a comprehensive solution for the construction industry ranging from Expansion Joint Covers in Tie Movement Joints, as well as Entrance Rolling Systems. The regional products of Neus are manufactured according to most common international standards to meet the requirements of commercial, residential, governmental, transportation, healthcare, and educational projects.

Product Range:

- Neus Expansion Joints
- Neus Tie Movement Joints
- Neus Entrance Rolling
- Neus Fire Barrier System
- Neus Tie Trim Profiles
- Neus Blind Rolling Profiles

*Please Check the latest products
to access more information!*

During 2021

During 2021, the Neus team have only concentrated on the Neus expansion joints. Agence H&S Sales is attributed to Expansion Joints. Now in 2021, we are heavily concentrating on the entire Neus Product Range. Aggressive marketing strategies are being implemented. There is a dedicated website being developed for Neus as well.

Future Developments

We are planning to take the Neus brand beyond MENA Region into Far East Asia and the team is working on this initiative since June 2021. We have already appointed a distributor for Neus in Canada, and I am also finalizing one in Malaysia and the other one in Singapore. The vision after this is to get this brand registered in the US to enter the needs of European Countries & North America...

Major NEUS Orders

- Salin HQ, Beirut, KSA (SAR 1.0 Million)
- King Khalid University (KKU), Khawara, KSA (SAR 0.1 Million)
- Shuabert Housing Complex, Muscat, Oman (SAR 0.1 Million)

Major NEUS Approvals

- HUPM, Dhahran, KSA
- JFMSD Business Park, Dhahran, KSA
- SABIC HQ, Jubail, KSA
- Hall of Oman, Muscat, Oman
- Central Prison, Salalah, Oman

Performance in Numbers

ENCOURAGING INNOVATION & SUSTAINABILITY IN SFSP FACILITIES

Sustainable Future

Solar power has become an increasingly popular option as we decided to install Solar Panels at SFSP DC to seek out environmentally friendly alternatives to fossil fuels and also take advantage of this technology by utilizing our own energy till next month. This is an energy source that can be deployed anywhere, even in incredibly remote locations. We have plenty to benefit from in terms of installing solar panels and following are few:

- Cost Savings
- Sustainability (Not relying on a finite source of energy)
- The ability to avoid the trading/energy rates
- Energy Storage
- Return on Investment
- Reduced Carbon Footprint

SOME NUMBERS & FACTS:

1. Increase the total Casing from **80% - 85%** in 2020 tariffs
2. Increase the capacity of the installed plant from **2,000,000 KWH** to **3,400,000 KWH**
3. Based on previous point, increase the generation of our electricity credit with SFSP to cover our consumption for **24 years** instead of **30 years**.
4. Based on the above we were able to guarantee a saving of **30,00,000,000** in 24 years... with **2000** investment
5. In addition, to this there are 2 parking areas in DC that will be re-constructed using Solar Panels, as part of the agreement, to promote sustainability and green buildings approach.

NEW SFSP FACILITY

Site of the New Facility

New Industrial Area (N) 20% of Sidiary City Centre - Egypt

Area of the Facility

10,000 Sq. Mtr.

Construction of this Facility

We received the new land officially on 20th April 2021 along with the land description card and we have submitted all requested drawings (mainly architecture drawings) within 60 days from the official land receiving date. We are waiting for their approval to proceed to have construction license or permits and resolved.

We have to have the construction license and start the project within 270 days from the official land receiving date (that includes the 60 and 90 days mentioned above). The maximum period for the whole project is 30 months from the official land receiving date and we have to acquire an operating license.

The project can be partial but we have to finish at least 60% of the approved proposal, so the facility must be working within 30 months from the official land receiving date with at least 60% of the approved proposal and the rest can be executed on a later date.

Products Fabricated in this Facility

All range of SFSP products and finished and will also accommodate Galflex warehouses and offices in addition to a new ISO facility and the existing ISO Unit.

Which countries / Regions will this Facility cater to:

Egypt & North Africa

Key Numbers:

- Total Land Area: **10,000 Sq. Mtr.**
- Fabrication Area: **6,000 Sq. Mtr.**
- Store Area: **1,000 Sq. Mtr.**
- Packaging & Delivery Area: **1,000 Sq. Mtr.**
- Galvanization Area: **1,000 Sq. Mtr.**
- Guard Room Area: **10 Sq. Mtr.**
- Total = 10,000 Sq. Mtr. = **85.20% Utilized Space**

Please Check the name of the linked documents to access more information !

Important Points Discussed & Decided

The new facility will be used by both SFSP and UNCTAD and the office building will be divided into two floors around HSE Bay Area.

- First floor will be for labors and employees in addition to the maintenance room
- Second floor will be divided to store UNCTAD and SFSP operation offices.

Before the project stages we confirm that we require the full area to be built at once.

- **Admin Building** will accommodate both UNCTAD and SFSP
- **Factory building** to accommodate all machines and SFSP production lines.
- **Warehouses** will be used as UNCTAD and SFSP warehouses
- **HSE** to accommodate the new HSE plant for Egypt.

We also emphasize on the requirement of using G.M standard panel throughout the project buildings to prevent damaging the roof and sides of the buildings caused by the dust fumes generated from the HSE process.

Also steel structure for the HSE shed should be painted with special anti-rust paint and covered with fiber glass coating ..

Note:

Once the Facility will be Operational, there will be 60 to 800 more revenue generation.

DIGITAL ROADMAP

UNITECH E Shop

Unitech eShop will be available exclusively in Saudi Arabia, headquartered in Jeddah. Contact details will be as per the current highlighted contacts within KSA. An exclusive email for the eShop has been created: Unitech.eShop@unitechgroup.com

Org. Structure

eShop Manager:

Will be responsible for the following objectives: (1) Marketing promotion activities "Paid ads, SEO", (2) Analyze the performance reports of the eShop, (3) R&D of the eShop "brand improvements and user ability".

Sales Cycle Rep.:

Will be responsible for handling the sales cycle (Inventory upload to eShop, handling of eShop-based order, managing the logistics as instructed in eShop-based invoice and coordinate the cycle with customer support if required).

Product Specialist:

Will be responsible to provide product specific data and technical support to sales cycle rep. (Data: product description, instruction manual, warranty statement, return policy and material safety data sheet).

R&D Specialist:

Will be responsible to assess market potential for new products and/or category additions to the eShop and ensure consent from partners/ supplier for product marketing material usage.

For Tools, Hardware & Consumables

Key Information

- Platform provided by Shopify based on monthly subscription.
- Platform-related apps (> costs associated) payment app (Credit card, Mada, AMEX and STC Pay), Customer Management "data base storage", Logistics integration "at a later stage depending on volumes generated" and marketing functionalities.
- IT support will develop a new ERP ecosystem designated as eShop ERP, and the agreed quantities of the selected products (divided with product specialists) will be exclusively look for the eShop inventory. It is preferred to bring the exclusive eShop inventory in Jeddah as that will be the initial eShop HQ until sufficient data is gathered (volumes, client location and top selling products).
- Initially, the logistics will be handled manually by the Sales Cycle rep. Order will come through eShop and the Sales rep will do the following (Invoice sale in ERP against eShop Invoice and then organize logistics as per details included in eShop Invoice).
- A period of 3 to 3 months is required to effectively penetrate the market and build a solid data base, which will serve to provide an insight on volumes and status/ client locations and all of that will serve to help facilitate the best logistics deal.

DIGITAL ROADMAP

UNITECH E-Shop (cont...)

Financial Cost Analysis

- Platform cost (Shopify) = **750 per month**
- Cost of adding business activity to CRM (e-commerce retail) = as per CRM target department
- Platform added apps (tools associated)
 - Purchase of a Website Theme = **100, one time**
 - Purchase of a Domain = **20, one time**
 - Payment gateway (Credit card, Mada, UAEI and STC Pay)
 - Customer Management/ "data base storage" = under study
 - Logistics integration "at a later stage depending on volumes generated"
 - Marketing functionalities = "refer to marketing department manager"
- Total year fixed apps = **6000 (31 months subscription) + 1000 (Theme) + 200 (domain) + 10700 (associated cost)** "totally associated to eShop setup costs including marketing activities" - FOUNDED PART - SETBACK COSTS

DIGITAL ROADMAP

New NEXUS Website

Customers are no longer satisfied with what's standard. On the contrary, they expect our limited products that reflect their own wishes or meet their specific needs.

Product attributes such as color, size, shape, features, and technical details can already be selected online, allowing customers to configure a tailor-made product.

We have designed a robust product selector page for Nexus Product Range and you can experience it while visiting the website <https://nexus-ibm.com/product-selector.php>

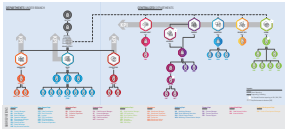

The customers can utilize this platform to search the solution that will fit their technical requirements, either by code or by features.

DIGITAL ROADMAP

CRM Development

The whole idea behind CRM is not only to develop the flow of information but it is also gives you the opportunity to maximize growth of each employee per CRM within the organisation. Only this way forward we will be able to balance the equigrowth ratio vs. rationality. In order for such a task to be executed the following has to take place:

► The Organization can be downloaded here.

DIGITAL ROADMAP

- As per attached Org. Structure for CRM Mapping there are clearly defined roles among the support functions which have to be well defined and recognized. Most functions are mixing within the branches while in some branches some functions are held by the same people which is acceptable given that these functions don't interfere in misleading information within the system, for eg. the function of entering the goods in warehouse through ERP as the coordinator/ loading master can't be held by the same management that oversees these functions. They have to be few different relationships in order to ensure the functions are executed properly.
- List of functions will need to be added within the CRM mapping as it was drafted in 2020. Plus ERP issues and limitations to all employees to be noted and resolved.
- Code creation team has to be created. There was a meeting held in Jeddah which included Saleh Al Saadi, Helen Marrow, Omar Saleh, Tawfiq Alai and Marwan El Hachem to discuss the issue. A program is being developed by the CTO (which is yet to be offered) where they will conduct a feasibility in order to understand Delta's requirements and resources to accomplish this task.
- The KPIs shall be developed as shown in the chart on the previous page. development of customized KPIs to be discussed with the CRM & CTO team.
- There will be introduction to KPI system making sure that each quarter there are clear indicators for people to understand and know if you are working hard the management is paying attention. We have to wrap the national aspect of assessing the system through award of results or the desire of awards manager. Same shall be followed upon year end evaluation where each employee understands that their achievements are notable and logged in with hope of a reward, given they completed all tasks given by the company. These evaluations are a must before taking decisions to move forward in order to create a respect of employees from both directions.

- Project tracking sheet has been developed it would be implemented in the CRM. This tracking report is developed from the industry best, it illustrates all the products that are required on the specific project. This was phase 1 of the tracking sheet in order to understand the products involved within this project. Phase 2 will be the incentive customer intends these project trackers in order to highlight the most sell items within the project or branch and correlating this information with TDS, to keep up with the branding and minimal targets to acquire these brands. This is the only way forward to ensure that we sell all production on a specific project. Again KPI system introduction and Branch manager upon reflection/progress of this sheet shall be considered and there shall be considerable amount of their income related to this activity in order to create an ownership from the heads.
- All key working Saudi individuals shall be put in a Talent program designed by my office and focused on improving their skillsets, well as granting them more authority in order to ensure that we retain the Saudi development that has been existing for the past 5 years.
- Budget by Category to be also added towards the KPI system towards Area and Branch managers in order to improve the ownership of the budgets submitted where the budgets shall be studied and submitted rather than some branches filling and information is just submit numbers and is nothing about it while spending on daily basis.

PRODUCT DEVELOPMENT ROCKFON

Product Category:

Acoustical Solutions

Country of Origin:

Poland / Malaysia

Developed For:

KSA, Kuwait, Bahrain, Egypt & Qatar

Product Range

Rockfon tiles and panels are especially designed to provide acoustic ceiling solutions that are beautiful while creating healthy, comfortable spaces. For More Information, Please Visit: <https://www.rockfon.com/products/>

Application Areas

Every space presents its own challenges in terms of acoustics and design. Rockfon acoustic ceiling solutions have strong performance standards and make an important contribution to creating a comfortable indoor environment in all buildings. For More Information, Please Visit: <https://www.rockfon.com/application-areas/>

Current Development

Since 2019, we are working towards developing this product and getting it approved on the projects of over KSA, Kuwait, Qatar and Egypt. Many of the projects include Hospitals, Schools, Offices, Retail Shop Centres etc.

Although Rockfon is considered the bulk/stop of acoustical solution, the sales of Rockfon is not reflecting the trend due to the high competition in the market (GCC) and Rockfon are not interested to serve the commercial and low budget projects and KSA has gone/has been/is not available in Rockfon Product's Region but in 2021 we have entered more geographic area (GCC) only central north issued a bulk order this year Central Bahrain, Jordan.

Rockfon still does not believe in reducing their prices due to competition especially for B & B from Indonesia panels and for their distribution which is very high prices even sending many tenders to their management. Therefore, we started to make manage where we have the supplier instead with all the inquiries and the tenders getting them (along with coordination with TGA) on a monthly basis in order for Rockfon management understand the market dynamics and this is working. Rockfon acknowledged that there is a buying requirement (United staff as well as they need to hire a Technical Engineer in KSA who is available to provide immediate technical response on all the inquiries.

Five Notable Product Approvals

- Sun H Land Sharmouh, Riyadh
- Five Guys, Makkah, Riyadh
- MCC Bank, SAUD, Jeddah
- King Abdul Aziz Airforce, Eastern Region
- VCB Chemicals, KSA
- LMC Chemicals, KSA
- Bopine Chemicals, KSA
- Cinopole Chemicals, KSA

Performance in Numbers

United Total Sales (2019 - 2020) 11.14Million SAR.

- 2019 : 5.5 Million SAR.
- 2020 : 11.14 Million SAR.
- 2021 (Half June) : 1.4 Million SAR.
- Orders in Pipeline : 1.9 Million SAR.

Note:

In March 2021, Egypt awarded the first order for Rockfon for the value of 750,000 SAR on the Nations Project at the Cairo Pedestal City through ACC.

PRODUCT DEVELOPMENT

FADE ACOUSTICS

fade

Product Category:

Acoustical Solutions

Country of Origin:

Denmark

Developed For:

All Indoor Spaces

About Fade

The fade® Acoustic Plaster is a high-quality plastering system that absorbs unwanted noise in a wide range of environments. It is an acoustic plaster solution spray applied to walls and ceilings. Its highly absorbent qualities allow for optimum acoustic control in large, commercial spaces.

The fade® Acoustic Plaster System can be applied on virtually any surface including straight and curved walls, dramatic angles and undulating domes offering a more flexible, discreet alternative to traditional acoustic solutions such as suspended ceilings.

Bringing together high-value aesthetics and acoustic performance, the fade® Acoustic Plaster System is well suited to a wide range of environments, from historic buildings to high end residential, commercial, retail and industrial spaces.

By absorbing sound waves, the fade® sound absorbing plaster system reduces reverberation time, providing the highest level of sound absorption. In addition, the installation process is quick and easy to install and it does not contain any synthetic materials. For more information, Please Visit: <https://fadeacoustics.com/>

Current Development:

In order to cover the shortage of facilities (prior to product) UNITECH will sign a distribution agreement with R/S Fade acoustical. Fade Acoustics Ceiling is a Danish Manufacturer of Acoustic Plaster System recently acquired by Saint Gobain. Their product is very unique, made of perlite and hence incorporates no noise. They are present in most of the countries worldwide and facilitates in almost all the prestigious projects around the world. (More info: <https://fadeacoustics.com/>)

They are also working on Riyadh Metro Project (Monitored by Qatar Rail Infrastructure). Recently they won the Dubai Mall refurbishment job (BIDD open) work in progress and Corals @ Expo 2020 & New World Line Dubai projects. Their system can be applied virtually on any surface and at any angle, achieving high sound absorption class. Fade® Acoustic Plaster comes in 4 colours (RAL/HC). This system will also complement our Acoustic Ceiling Systems by facilities, having this product our brand will make us a complete solution provider of acoustical ceiling & walls.

Note:

UNITECH is to be an exclusive distributor for Fade Ceiling offering solutions to UNITECH and Qatar (product offered to Mr. Ghaleb al-Tajer) and they are ready to sign MOU as per any country. Fade will hire a Specification and Sales Manager for the KSA market and this person will be based in KSA to generate leads and technically support UNITECH whenever required.

Fade will ensure a very competitive price to UNITECH. Their products can be sold as supply only or supply and apply. Fade shall share all market inquiry's to UNITECH, who have already sent to UNITECH some leads to start quoting such as DMC HQ in Jeddah, Al-Jawhar in Ta'if in Jeddah and we are preparing to do a makeup sample in SOFAB project in Riyadh.

Unlike other soundproof materials in the KSA, we expect a 27 MC container (1000 loads etc, 1000 sqm). It will also enhance our DTP Systems accessories sales which is needed as support for each Product / Solution.

PRODUCT DEVELOPMENT PLITEQ

Product Category:

Acoustical Solutions

Country of Origin:

Canada

Developed For:

All Industry Sectors

About Pliteq

Pliteq is deeply committed to continued engineering research and development of its many products and manufacturing processes. We have new inventions under development as well as numerous patents registered in the United States, Canada and other countries worldwide. Pliteq has over 15 US Patent products as well as numerous additional structural and building certifications.

Testing is what sets us apart. Our engineers have completed over 2000 laboratory tests in the last ten years with a commitment to a monthly testing schedule as we consider only recent testing to be relevant for engineering purposes.

Over 50 technical sales engineers and sales team support members are located throughout all major metropolitan areas in North America, throughout the UK and Europe, the Middle East and Asia Pacific. We are proud of our exceptional customer service and collaboration team throughout the world. Pliteq receives the equivalent of 15 million hits per year, and this is accomplished by our manufacturing and logistics colleagues at our 100,000sqft of facilities. Throughout history Pliteq has completed over 15,000 commercial projects globally focused on our commitment to engineering and development.

Pliteq is on a steady growth trajectory and will continue to be a leading innovator in architectural acoustic solution and sound control on global scale for Manufacturing. For More Info: <https://pliteq.com/>

Current Development:

Product online information from Patent for SNTTECH & Market Feasibility is being worked on to make launch within the brand.

PRODUCT DEVELOPMENT PLEKO

Product Category:

Construction Chemicals

Country of Origin:

USA

Developed For:

All relevant markets

About Pleko

PLEKO is a known name when it comes to Exterior Insulation and Finish system (EIFS) construction technology and products. EIFS is a general class of non-load bearing building cladding systems that provides exterior walls with an insulated, water resistant, finished surface in an integrated composite material system. Pleko offers the best of two worlds. Alternative finishes that accommodate many design concepts and cost effective practical solutions to building requirements.

At the same time it is easy to apply, weather resistant, durable, damage resistant, and virtually maintenance free. All at a reasonable initial cost.

UNITECH has joined forces with our sister company Pleko-Systems KG for the distribution of Construction Chemicals for below products under Pleko Brand:

- Tile Adhesives & Grouts
- Waterproofing
- Specialty Finishes
- Skim Coats
- Floor Renderings, Curing & Sealings
- Concrete Refurbishment
- Self- Levelling Compounds
- Dust Control & Soil Stabilization
- Exterior Insulation and Finishing Systems (EIFS)
- Pleko/Unitech manufacture our own brand (as they have the experience – in the future)

Current Development:

UNITECH will keep submitting Caporal EIFS System (outside Pleko EIFS system) in order to increase UNITECH chances to win the project. (consultant will approve three supplier bids at least and UNITECH and one can submit one of them under Pleko) depends on project, client budget, requirements, cost of material (UNITECH IP).

As PLY Caporal are looking for local manufacturer in KSA, UNITECH generally discussed the possibility of manufacturing certified dimensional Caporal products under Caporal brand in order to compete with the local market. This action need to be discussed in details between UNITECH & GURGO management.

UNITECH started quoting for the clients, Project Tracking Reports are created, all technical support, and marketing tools are available.

It's highly recommended from the product development dept. is that we can obtain Pleko as a factory under UNITECH, where the factory can make profit more than sales team (Unitech)

As long as we have a well established technical team (which exist in PLEKO) we can expand the range as much as we want.

PRODUCT DEVELOPMENT CAPAROL

Product Category:
Construction Chemical

Country of Origin:
Germany / GERMANY

Developed For:
KSA, Egypt & Lebanon

About Caparol

Caparol, the premium brand of GOM entered the Middle East market in 1998 with its technologically advanced Modern and sustainable product range. With a production plant in Gules, Caparol is spearheading the demand for architectural consistency in the Middle East and African Countries. The striped elephant has been synonymous with reliability, technical expertise and outstanding product performance.

Product Range

- ▶ Interior Paints
- ▶ Exterior Paints
- ▶ Flooring Solutions
- ▶ Thermal Insulation (EPS System)

*Please Visit the linked products
to access more information!*

Unique Product

- ▶ Anti-Microbial Paint with Silver Nan Technology
 - ▶ It is certified against Covid-19 virus
 - ▶ Please watch the video by clicking [here](#)

For More information, Please Visit:
<https://trappentextiles.com/>

Partnership & Plan

Trappentextiles partnered up with Caparol to enter the sector of Paint Business and commercial EPS technology.

Five Notable Product Approvals

- ▶ Ministry of Housing
- ▶ Ministry of Education
- ▶ Ministry of Health
- ▶ KJUPM University

Performance in Numbers

Greatest Total Sales (2020 – 2021) - **12 Million SAR**

- ▶ 2020 - **0.5 Million SAR**
- ▶ 2021 (Year to Date) - **12 Million SAR**
- ▶ Orders in Pipeline - **1.3 Million SAR**

PRODUCT DEVELOPMENT

EAGLE SEAL

Product Category:

Construction Chemical

Country of Origin:

Germany/ China

Developed For:

All Substrate Materials

About Eagle Seal

Eagle Seal is a known brand for silicone seal and molding systems. In recent years we have added more products to cover more applications in construction and strengthen the traders network.

Product Range

- Universal Sealant
- Acrylic Sealant
- Acrylic Sealant
- Acrylic Sealant
- Neutral / Weather Sealant
- Universal Sealant
- 150 100 (Mud)

Current Development

One of the new products launched in late 2020 was a specialized silicone sealant (Made in Germany), and the first container was loaded was in Jan 2021 and it was very successful in getting clearing of the stocks and we had a total sales of EUR 1.5Milion. Currently we are facing problems with the Product Pricing. The current manufacturer local selling is dropping the price and there is very high competition in the market for such consumable product. However the Product Development Dept. is looking another manufacturer with better prices.

PRODUCT DEVELOPMENT TERRAM

Product Category:

Geotextiles

Country of Origin:

IN / India

Developed For:

KSA, Egypt, Kuwait & Qatar

About Terram

Over 50 years ago Terram patented the first ever geosynthetic system, and they haven't stopped innovating since. Their commitment to research and development, along with quality manufacturing, has resulted in a line of products known for their outstanding safety, durability and performance.

ENR/ENR added 3 new products from Terram to serve the below construction sectors: Highways, Coastal, Railways, Landfill, Mines, Tunnels, Waterways, Flood Defense & Land reclamation. These products are:

- ▶ Geocomposites
- ▶ Geocells
- ▶ Geogrids
- ▶ Geotextiles / Barrier
- ▶ Geotextiles

*Please Check the listed products
to access more information !*

For More information, Please Visit:

<https://terram.com/>

Distributorship

We are an exclusive distributor for Terram - Geosynthetics Solutions, and our partnership is 5 years, strong now and we have access to new innovation, trusted and proven Geosynthetic products & solutions.

TERRAM products will maintain and increase our market share within the above mentioned construction sectors.

Geotextiles related Project Update

The amount of Geotextiles projects in the Kingdom are unprecedented. For Ex: The new King Salman Port will be the largest urban port in the world, covering 16.3 square kilometers.

On 10 March 2021, The Saudi Crown Prince Mohammed bin Salman announced the green initiatives that are set to apply a number of ambitious programs that will reduce carbon emissions by 100 percent in the region and plant 10 billion trees in the world's biggest afforestation project.

Total Sales of Terram As of June 2021 is around 5.5 Million SAR.

PRODUCT DEVELOPMENT BMG

Product Category:

Steel Solutions

Country of Origin:

USA

Developed For:

KSA, Kuwait, Egypt & Qatar

About BMG

■ Metal Doors

Doors are a legal requirement for all commercial properties, whether industrial,retailer,merch,hotel,educational buildings, houses, hospitality,healthcare, education or retail offerings. BMG designs every door to order, for customer can decide exactly which features they want to include. From fire rated protection and lockers to a soundproof filling, the customer will receive a specialized door purpose built for your building.

■ Metal Ceiling

Metal ceilings are usually specified in modern buildings for many valuable reasons. It is considered as high performance ceiling due to the increased life span and durability. The high recyclable content also makes it one of the most valuable ceiling solutions in the new building code.

■ Access Panels & Roof Windows

An access panel is a door, panel or piece of plywood that can be easily removed to provide access to a shut off valve, drain or other (hard offed) plumbing part for which you need occasional access in order to make a repair.

Current Development

BMG is an excellent supplier and the relation with the management is very strong, we expect the sales to increase 2 folds in the coming years. The BMG products range is improving and we will be discussing with BMG to start manufacturing their items in UAE to avoid the customs, taxes and delivery charges which are affecting our sales figures, and this will ensure that we'll still have the experience and know how to develop our own brand of Steel doors, Access panel and metal ceiling in the future under BMG.

Performance in Numbers

During 2021, we were successful in getting total orders of **US\$ 4.8 Million SAR** for Steel Doors and Metal Ceiling Combined.

As of June 2021 we have sales of around **1.1 Million SAR** with **0.8 Million SAR** orders in Pipeline.

PRODUCT DEVELOPMENT GYPROC

Product Category:

Cell Solutions

Country of Origin:

USA

Developed for:

USA & Canada (already Well Established in USA)

About Gyproc

The extensive range of Gyproc plasterboards and plasters is fully supported by high grade metal system components and accessories and a wide range of ceiling tiles and boards. This unrivalled choice of products enables the designer to specify complete interior fit-out systems with total confidence. For more information please visit: <https://www.gyproc.co/products>

On 19 Oct 2020

It was decided that Gyproc will partner with Celotex in USA. This partnership is an opportunity to expand our business in USA where we will have additional 70 Million USD in new markets selling Gyproc Products. We developed an operational layout that would help us reach this goal.

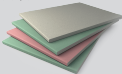

On 25 Jan 2021

It was agreed with Gyproc for the distribution of their products in Oman as well and this will add an additional 8 to 10 million USD in United's Revenue in 2021.

Performance in Numbers

United's USA Total Sales As of June 2021: 70 Million USD

- 2020: 1.8 Million USD
- 2021: 5.7 Million USD
- Orders in Pipeline 7.3 Million USD

PRODUCT DEVELOPMENT CLIMAYER

CLIMAYER

Product Category:

MSF Solutions

Country of Origin:

Kuwait

Developed for:

Currently for KSC, In future, it will be available for UAE, Egypt & Qatar

About Climayer

CLIMAYER[®] is an innovative product by Saint-Gobain. It is a self-supporting duct system. Ideal for any ventilation and air conditioning ductwork, CLIMAYER[®] air ducts are a state-of-the-art pre-insulated duct system made from glass wool, lightweight, efficient and easy to assemble. CLIMAYER[®] is adopted in any project. CLIMAYER[®] self-supporting ducts were designed not only with building occupants in mind, but also ease of installation and reduced environmental impact. Unlike traditional ventilation ducts which require an expensive exterior layer of insulation, CLIMAYER[®] insulation is integrated directly into the duct structure. Glass wool insulation is surrounded by highly durable interior and exterior facing surfaces for rigidity and ease of cleaning.

Major Advantages:

- ▶ Easy Installation
- ▶ Thermal Insulation
- ▶ Acoustic Performance
- ▶ Acoustic Insulation
- ▶ Environmentally Friendly
- ▶ High Pressure Resistance
- ▶ Easy Maintenance and Durability

For More Information, Please Visit

CLIMAYER[®] Self-supporting ducts

Partnership & Plan

We have launched this product in the Western, Central & Eastern Region of Saudi Arabia. There is a positive response from the market, however it is always tough to steer away the customers from traditional ways, and push them towards innovative ways of solving a problem.

There is no doubt that CLIMAYER is an innovative duct system, however it would take time for the market to adopt to this new product. This is a priority product for development during 2021.

PRODUCT DEVELOPMENT

THOMSUN

Product Category:

HEP Solutions

Country of Origin:

US / IND / India

Developed For:

All Global Markets

About Thomsun

T HOSUN Pipe Clamp: MITSUBI is signing a distribution agreement with T HOSUN Pipe support system & Pipe hangers are designed elements that transfer the load from the Pipes to the supporting structures. The four main functions of a T HOSUN pipe support system are to: stabilize, guide, absorb shock, and support a specified load. T HOSUN Pipe support system used in high or low temperature applications may contain insulation material.

For More Information, Please Visit:

T HOSUN Thomsun Products

Current Development

The plan of signing such an agreement with such a requested name is to distribute our (MITSUBI) the only missing aspect for our pipe clamp is the technical support while all test certificate is available, therefore we need someone technical from (OPE) team to support the sales force.

[This product needs technical approach more than commercial with our client]

PRODUCT DEVELOPMENT TUNGSRAM

TUNGSRAM™

Product Category:

Technical Product

Country of Origin:

Hungary

Developed for:

For new ECU, Substrate & Control. In future for all vehicle brands.

About Tungram

Tungram, is a Hungarian Manufacturer, was part of General Electric (GE Lighting) for over thirty years, and until April 2018, it is privately held. Tungram has been in existence since 1994, employs over 6000 people and has 11 factories in Hungary produce extensive portfolio of lighting. Tungram also one of the key players in Horticulture and Automotive Lighting and they are very active in the Smart City application. With presence in the Middle East for the last 11 decades, Tungram based in Dubai. Their products are already approved in Technical, which covers all retrofit projects under municipalities as all government related retrofit projects are being done by Technical. Besides that, they have OEM/COO relation (along with ECUH / KCO) as well.

Product Range

- Indoor Lighting
- Outdoor Lighting
- Traditional Lighting
- Entertainment Lighting

*Please Click the blue products
to access more information!*

For More Information, Please Visit

<https://tungram.com/en>

Partnership & Plan

GElect has partnered up with Tungram to enter the Lighting Business. The plan is to package their lighting solutions along with our other offerings in the following combination sectors:

- Cinema Projects
- Housing Projects
- Mining Projects
- Entertainment Projects
- Recreational Projects (Outdoor Products)

Major part of all Tungram products are related to the traditional use of the market, such as Indoor & Traditional Lighting. UNTECH official account in Tungram books, approved by end of April the supplier response is slow, this issue related to their management. However, product knowledge training will start after Eid (online or by site visit) UNTECH sales force related to collect the available inquiries.

PRODUCT DEVELOPMENT

DECKING SYSTEM (Business Concept)

Product Category:

Architectural Product (Developed under Niche)

Country of Origin:

Supplier not finalized yet

Developed for:

For new ICE, Salinas & Casati. In future for all Salinas Branches

About this Business Concept

Wood plastic composites (WPCs) are made from Polyolefin, natural fibers sourced from replantable sources and a combination of additives. Using WPC instead of traditional wood has a slew of advantages; the biggest being that WPC products can be custom engineered according to the environment in which they will be used.

This makes WPC products durable and eco-friendly, the 2 most important criteria's while choosing WPC as an alternative to traditional wood. A flooring that lasts longer ensures that less wood would be needed to meet the demand, thus making the process environment friendly.

UNITECH did not finalize with any supplier yet, but this business concept started to be offered to our clients, Project based is most likely to be signed with our own might go for our own brand, Signing a contract with manufacturer will remain on hold till 06/01/2023.

During this time we are scanning and analyzing the market from many aspects (Price, Competition, Quality, Market demands, Inquiry volume, Expected Sales) to take the right decision to sign for an agency or with a manufacturer for our brand name (both options are available , going to our client will not be affected)

OPERATIONAL RESTRUCTURING

The Restructuring aimed to extend the scope of the vision that is to empower the new generation of leaders within the company and to bring about new ways of solving problems of suboptimal performance. Following are the announcements made during 2021:

In Saudi Arabia:

Eng. Ali Al has been appointed as "Sales Director" for UNITECH SA, reporting to Jamal Dahan

Muhammad Alshakani has been appointed as "Operations Manager" for UNITECH SA, reporting to Jamal Dahan

Fahmy Alami has been appointed as "Credit Control Manager" for UNITECH SA, reporting to Jamal Dahan

Dr. Abdulaziz has been appointed as "Internal Audit Head" for UNITECH SA, reporting to Jamal Dahan

Khaled W. Salaf has been appointed as "Accounting Manager" for UNITECH SA, reporting to the Finance Manager of Unitech SA

Faisal Alkhamis has been given additional responsibilities and appointed as the "Technical Manager" for UNITECH SA, reporting to Jamal Dahan

Abdulrahman Alkhatib has been appointed as "Business Development Manager" for UNITECH SA, reporting to Jamal Dahan

In Qatar, Egypt & Lebanon

Muhammad Alami (MT) has been appointed as "Tech. General Manager" for UNITECH EG which consist of the following countries under it (Qatar, Egypt & Lebanon), reporting to me (Eng. Ali Al).

Muhammad has a very specific set of skill - he is a leader when it comes to developing

new products and pushing sales. What is required in Qatar & Egypt is to diversify our offering and to increase the sales of our steel items. We now have success fully done in Saudi Arabia.

Throughout MT time until the end of this year to show me the progress that I want to see in the areas given under him. He shall provide me a robust plan for the next year - listing all the growth opportunities in these areas - including the list of products to be developed / prioritized in these countries.

The Development requested from MT in each country/region is discussed later in this report where I have given directions specific to the development in each country /region given below.

Authority Matrix:

Along with the Organizational Restructuring, We have also given sub-structured individual more authority. For this purpose we had created a authority matrix.

This Document is essential to the internal control within all businesses activities as it defines the financial and administrative responsibilities and authorities del. equated to those in charge of approving the decisions and transactions within the business.

Our internal authority matrix was designed on the basis of the organization structure and support business processes.

Please Download the Current Authority Matrix

[Download Authority Matrix](#)

SPECIFIC DEVELOPMENT BY COUNTRY

Saudi Arabia:

Traders Development

Super the original budget submitted for traders in 2021 of SAR 5.8 million the follow ing KPIs to be achieved:

Q1 performance of gross sales SAR 1.5 million while Q2 performance of gross sales SAR 2.2 million showing growth as well as SAR 10 million per month in Q2 against 70% of total United & achievements. The division is growing and showing signs of improvement.

Q1 performance of collection was SAR 12.6 million while Q2 performance of collection was SAR 17.1 million showing a drastic increase in collection compared to earlier quarter. These signs indicate that the new setup with three main operation in KSA exporting to the Sales Division rather than the branch operations helps improve the results. This was direct result of giving ownership to those individuals in order for them to perform.

The Management is heading with the leading team now towards industrial growth of business and planning to achieve a stable SAR 1.8 million worth of sales monthly through this division beyond of this year. The product line we are planning to focus is being worked on by T&E & Product Dev Dept.

Major Approval Obtained

Operational Factory for Steel Products in KSA has finally obtained and Success Order 14 by qualifying a rigorous inspection conducted by customs officials.

What does this mean to us?

This means that we are one of the few recognized suppliers to manufacture as per Saudi Bureau Standards. Saudi Bureau only qualifies the suppliers with high-quality standards, innovative products and services, competitive prices, and on-time delivery adding value to the supply chain in this way, and having the ability to scale up to meet growth challenges within the business, are also recognized. Our job has just started – the commitment to quality and high standards based on which we have qualified as a supplier for Saudi Bureau, we need to maintain it and take it to the next level.

UAE:

We successfully started promoting Agipco product, we were able to close many deals and get many projects. We are constantly improving and developing our relationship with Agipco as a supplier and with our customers as well. We have very good potential projects like Doha head quarter, we are also a steel trader as a main distributor of Agipco in GCC market. Details discussed in the Product Development (above)

Starting 2022 We are only offering only focus expansion joints in all the projects in the GCC, we were able to enter the big projects and secured big orders like Sea World in Abu Dhabi and many other project where the gross margin percentage is very high. In 2021, We are heavily concentrating on expanding our local reach by starting producing profiles under our brand with 2 leading PVC, Stainless Steel and Aluminum in China and other resources the number of the profile will be between 600 to 800 types.

Development of Traders Division in UAE is a priority. This is especially true for Abu Dhabi branch where the Traders market is huge. I have directed Omar Al Badi on developing strategy to improve this division in order to gain the maximum business and parallel to this also design a monitoring mechanism where we have an eye on the credit limits and payment of each and every trader to avoid further problems.

We succeeded to win a 2 contracts in the oil field projects, one of them is getting supplied, the other one expected to start within next month.

There is more focus on the development of the Process and EPC contractors to sell them engineering/trade and secondary steel to cover the strong demand since oil and gas market is facing other drop.

There is clear improvement in Agipco figures, because we succeeded to gain all Agipco orders of one of top 3 industrial contractors in Abu Dhabi.

Working closely with SSP to handle a contract of stainless steel cable trays of hotel project, hope we will be able to gain despite the recent increase of steel raw material prices.

SPECIFIC DEVELOPMENT BY COUNTRY

Take some throughput organizational restructuring and then use all hand by the pandemic. One of the most difficult job is reducing the expense to manage the drop in Gross Profit.

However, with the fear of pandemic at bay, and the market (pharm)phoria, I have directed Mucor Technical to have coordinated efforts in Qatar with a focus on product development.

By 2025, I expect Saker to generate a turnover of 750 Million SAR. There are many ways that this can be achieved but we are sticking to the one that we know will work best and it is to bring in new products that can add more value and profitability. Eventually there will be more focus on the development of the following products:

- **Rescue**
- **Definitive**
- **Chemo**
- **CT/Porting**
- **Resection**
- **Resection**
- **Termin/Conductions**
- **EMG, Nerve Conds., L. Access Points**
- **EMG, N. Conductions, Nerve**

Manufacturers of the River Products in India

Notes: Providing advice with the management of GSF Staff Insulation Factory to help us increase the Sales of this firm. This has actively worked for development during 2022.

SPECIFIC DEVELOPMENT BY COUNTRY

Egypt:

The results so far are fair but not up to the market potential. I have directed Mustafá Tolmáci to take aggressive steps to penetrate and expand our share in the Egyptian market. MTT shall grow the sales of new products and see the possibility of introducing more profitable products to their market. Since the start of 2020, many new products are introduced such as: Resin, Filter, Acrylic etc. and water new products are going to be launched specifically for this market such as Wood from Scandinavia etc.

Below the end of 2020, I expect MTT to reach Egypt a branch that covers \$50 Million USD Annually until the way this can be achieved is needed product mix to cater the market of both Contractors and Traders.

Performance in Numbers

- Increasing the revenue by 20% comparing to the first 6 months in 2020.
- Increasing the collection by 50% comparing to the first 6 months in 2020.
- Increasing the Gross Profit by 8% comparing to the first 6 months in 2020.
- Increasing the Net Profit by 15% comparing to the first 6 months in 2020.

There is more focus on the development of the following products:

- Resin Complete Range
Resin is successfully introduced to the market that of \$20 (the biggest consultant in GCCF).
- Resin for Acoustic Systems
- Resin for Synthetic / Tiles
- Resin for Partitions / Columns
- BRG (Steel Doors)
- Chemical Range is being developed keeping the market needs in mind

New steel product sales shall increase by 30% instead of 10% (2020) vs. 30% for Steel Products.

Oman

Due to COVID19 pandemic we still facing a lot of new rules initiated by government which affecting the progress of all projects.

There is more focus on the development of the following products:

- Acrylic Products
- Resin Complete Range
- Chemical Paint Systems

Lebanon

I have given Mustafá Tolmáci a target of \$7 to \$10 Million USD. Though Lebanon is a small market, it is a market with great potential. Major focus of MTT shall be on the traders market, where he brings in products that would cater the needs & requirements of this market.

Performance Evaluation for the 1st half of 2021:

- Increasing the revenue by 20% comparing to the first 6 months in 2020.
- Increasing the Net Profit by 20% comparing to the first 6 months in 2020.
